

ARCADENEST PLAY - ONLINE GAMING WEBSITE

Freelancer PRD | arcadenest_online_gaming_website

1. Project Overview

Create a responsive multi page front end website for ArcadeNest Play. The site lets visitors browse exact sample games, open a detail view, review leaderboard rows, read update cards, and submit a support form. This is a Web Development task with a gaming theme, not a playable game build.

Field	Value
Company	ArcadeNest Play
Canonical task ID	arcadenest_online_gaming_website
Website type	Responsive front end website
Required folder	arcadenest_online_gaming_website
README title	ArcadeNest Play Online Gaming Website
Test browser	Chrome or Chromium

2. Exact Title Usage by Context

Context	Required Text
Browser title	ArcadeNest Play
Homepage hero title	Discover Browser Games in One Place
Game Library heading	Game Library
Leaderboard heading	Leaderboard
Community heading	Community Updates
Support heading	Support ArcadeNest Play
README title	ArcadeNest Play Online Gaming Website

3. Brand, Visual, and Interaction Rules

Use	Hex / Requirement	Must Apply
Main background	#111322	Site background
Panel / card backgrounds	#1C2040 / #222642	Sections and game cards
Accents	#7C3AED, #22C55E, #06B6D4, #F97316	Buttons, scores, tags
Text	#FFFFFF and #D8DCF7	Primary and secondary copy
Accessibility	16 px body text, 44 px buttons, 4.5 to 1 contrast	All pages
Labels	Icons may support labels but cannot replace text labels	Nav, filters, forms, buttons
Hover or focus states	Buttons and interactive cards must show visible hover or focus states	All interactive elements

4. Website Page Requirements

Page	Required Content	Minimums
Homepage	Header; hero with exact title, one supporting line, one primary button, one secondary button; featured games; categories; leaderboard preview; community preview; footer with navigation links, support link, brand note, and copyright line	4 game cards; 4 category tiles; 3 score rows; 3 updates
Game Library	Page title, search, Arcade/Puzzle/Racing/Strategy/Action filters, card grid, empty state	8 cards with title, category, difficulty, description, rating, action
Game Detail	Title, preview panel, description, controls/rules, difficulty, rating, play placeholder, related games	3 related cards; play button must not launch a real game
Leaderboard	Page title, Daily/Weekly/Monthly tabs, ranked table	10 rows with rank, player, game, score, time period; top 3 styled
Community Updates	Page title, update cards, newsletter signup layout with email field and submit button	6 update cards with title, date, tag, summary
Support	Intro, contact form, FAQ, response time, footer	Name field, email placeholder, message field, submit button, 5 FAQs

5. Navigation, Interactions, and Runtime Data

Area	Required Behavior
Header navigation	Home, Games, Leaderboard, Community, Support; active page visually marked.
Footer navigation	Home, Games, Leaderboard, Community, Support, Terms, Privacy; Terms and Privacy may route to placeholder sections.
Game search	Filters Game Library cards by title. Runtime test may search Neon Runner because it is mandatory.
Category filters	Filters cards by Arcade, Puzzle, Racing, Strategy, Action.
Leaderboard tabs	Updates visible rows for Daily, Weekly, Monthly.
Support form	Validates that name, email, and message are not empty.
Newsletter form	Validates that email contains an at sign.

Hover or focus states	Buttons and interactive cards must show visible hover or focus states.
Data storage	Game, leaderboard, community update, FAQ, and related game data must be stored inside JavaScript or JSON files.

6. Responsive Rules and Exact Sample Games

Screen	Width	Game Card Columns
Wide desktop	1200 px and above	4 columns
Standard desktop	1024 px to 1199 px	3 columns
Tablet	768 px to 1023 px	2 columns
Mobile	360 px to 767 px	1 column; no horizontal scrolling at 360 px
Mandatory Sample Game	Category	Other Content Rule
Neon Runner	Arcade	At least 10 leaderboard player names
Pixel Quest	Puzzle	At least 6 community update titles
Orbit Clash	Action	All form inputs require labels
Puzzle Forge	Puzzle	All images require alt text
Drift Circuit	Racing	No gambling, betting, casino, prize money, adult content
Shadow Tiles	Puzzle	No hate content or violent graphic content
Astro Blocks	Strategy	Console has no runtime errors on initial load
Turbo Tactics	Strategy	Sample data stored in JavaScript or JSON files

7. Technical Requirements

Build Approach	Required Files / Conditions
HTML, CSS, JavaScript	index.html, css/styles.css, js/script.js; no build step required.
Front end framework	Package files, setup commands, run commands, README steps; no paid services, private accounts, or external API keys.
Testing	Chrome or Chromium named in README.md; console shows no runtime errors on initial load.

8. Delivery Files

#	Deliverable	Format	Qty	Technical Spec
1	Source code folder	Folder	1	Named arcadenest_online_gaming_website
2	README.md	Markdown	1	Inside source folder; includes setup and run steps
3	Homepage screenshot	PNG	1	homepage_screenshot.png
4	Game Library screenshot	PNG	1	game_library_screenshot.png
5	Support screenshot	PNG	1	support_screenshot.png
6	HTML entry file	HTML	1	index.html if no framework is used
7	CSS file	CSS	1	css/styles.css if no framework is used
8	JavaScript file	JS	1	js/script.js if no framework is used

9. Required Folder Structure

arcadenest_online_gaming_website/ index.html README.md assets/ css/styles.css js/script.js screenshots/homepage_screenshot.png screenshots/game_library_screenshot.png screenshots/support_screenshot.png

10. README.md, Naming, and Zip Rule

Required Item	Exact Requirement
README sections	Project title, setup steps, local run steps, page list, feature list, tested browser, out of scope notes.
Screenshot names	homepage_screenshot.png, game_library_screenshot.png, support_screenshot.png
Source folder name	arcadenest_online_gaming_website
Do not use	ArcadeNestWebsite, gaming_site, online_game_project, arcadenest_final
Compressed delivery	Zip only the arcadenest_online_gaming_website folder after removing node_modules, cache folders, system folders, duplicate exports, and unrelated screenshots.

11. Out of Scope

Excluded Area	Not Required
Game build	Playable game development, game engine work, esports tournament management
Accounts and data	User authentication, database setup, admin dashboard
Payments and live systems	Payment processing, live chat, real time multiplayer infrastructure
Restricted content	Gambling mechanics, betting flows, casino games, prize money mechanics, adult content mechanics

Platform expansion	Mobile app development
--------------------	------------------------

12. Final Deliverables Checklist

#	Check	Required Result
1	Source folder	Named arcadenest_online_gaming_website
2	Homepage hero title	Discover Browser Games in One Place
3	Hero content	One supporting line, one primary button, and one secondary button
4	Homepage footer	Navigation links, support link, brand note, copyright line
5	Game Library	Eight exact games, search, filters, empty state
6	Pixel Quest category	Pixel Quest is categorized as Puzzle
7	Game Detail	Preview, rules, rating, play placeholder, related games
8	Leaderboard	Page title, Daily/Weekly/Monthly tabs, 10 rows
9	Community Updates	Six update cards plus newsletter email field and submit button
10	Support	Required fields, FAQ, response time
11	Hover/focus states	Visible on buttons and interactive cards
12	Data storage	Sample data is stored inside JavaScript or JSON files
13	Screenshots	All 3 PNG screenshots use exact required names

13. Page QA Matrix

Area	QC Test	Pass Condition
Homepage	Check title and section order	Hero title is Discover Browser Games in One Place; supporting line, primary button, secondary button, footer details appear.
Game Library	Test search / filters / empty state	Search Neon Runner works; filters change cards; no-match text appears.
Game Detail	Check play behavior	Play button shows placeholder state only.
Leaderboard	Switch tabs	Daily, Weekly, Monthly rows update without reload errors.
Community	Review cards and signup	Six cards plus newsletter email field and submit button appear.
Support	Submit empty form	Name, email, message validation appears.
Responsive	Inspect 360 px width	No horizontal scrolling and mobile menu exposes all links.

14. Required Data Inventory

Data Set	Minimum Items	Required Fields
Game cards	8	title, category, difficulty, short description, rating, action label
Homepage featured games	4	title, category, difficulty, short description, rating, action label
Related games	3	title, category, action label
Category tiles	Minimum 4	category labels
Filter buttons	5	Arcade, Puzzle, Racing, Strategy, Action
Leaderboard rows	10	rank, player name, game name, score, time period
Community update cards	6	title, date, category tag, one paragraph summary
FAQ items	5	question and answer text
Footer links	7	Home, Games, Leaderboard, Community, Support, Terms, Privacy

15. Runtime Test Script

Step	Action	Expected Result
1	Open index.html or run documented framework command	Website opens in Chrome or Chromium.
2	Click Home, Games, Leaderboard, Community, Support	Correct page or section becomes active.
3	Search Neon Runner on Game Library	Only matching game cards remain visible.
4	Select Arcade, Puzzle, Racing, Strategy, Action filters	Visible cards update by category.
5	Search a title that does not exist	Empty state text appears.
6	Open a Game Detail view	Preview, rules, rating, play placeholder, and related games appear.
7	Switch Daily, Weekly, Monthly tabs	Leaderboard rows update without reload errors.
8	Submit empty Support form	Name, email, and message validation appears.
9	Submit newsletter without at sign	Email validation appears.
10	Inspect 360 px width	No horizontal scrolling; mobile menu exposes all links.
11	Open browser console	No runtime errors appear on initial load.

16. Rejection Conditions and Alignment Lock

Risk Area	Reject When
Source folder	Folder name is not arcadenest_online_gaming_website.
Homepage hero title	Hero title is not Discover Browser Games in One Place.
Hero content	Supporting line, primary button, or secondary button is missing.
Footer details	Navigation links, support link, brand note, or copyright line is missing.
Newsletter signup	Email field or submit button is missing.
Hover/focus states	Buttons or interactive cards lack visible hover or focus states.
Game data	Eight exact sample games are missing or Pixel Quest is not Puzzle.
Data storage	Game, leaderboard, update, FAQ, or related game data is not in JavaScript or JSON.
Category logic	Category tiles and filter buttons are mixed into one unclear requirement.
Restricted content	Gambling, betting, casino, prize money, adult content, hate content, or violent graphic content appears.

17. Source File Responsibility

File / Area	Responsibility
index.html	Defines page sections, navigation anchors, form structure, and semantic content.
css/styles.css	Stores layout, dark interface colors, breakpoints, card grid, button states, and text contrast styles.
js/script.js or data JSON	Stores sample games, leaderboard rows, update cards, FAQ items, related games, filters, tabs, and form validation.
assets/	Stores local images or placeholder graphics with alt text.
screenshots/	Stores homepage_screenshot.png, game_library_screenshot.png, support_screenshot.png.
README.md	Explains setup, local run, page list, features, tested browser, and out of scope notes.

18. Final Handoff Notes

Check	Final Requirement
Scope match	This PRD mirrors instruction.md and does not add playable game, account, payment, multiplayer, or backend scope.
Instruction sync	Future rubrics must quote requirements from instruction.md only.
Browser review	Run locally in Chrome or Chromium before acceptance.
Responsive review	Inspect 360 px, 768 px, and 1200 px widths.
Final cleanup	Zip only the required project folder after removing caches, system files, duplicate exports, and node_modules.
